Education

University of Washington

Bachelor of Science in Informatics, Data Science Track, GPA: 3.75, Dean's List

Seattle, WA

Expected June 2028

- Relevant Coursework: Data Programming, Elements of Statistical Reasoning, Advanced Statistical Methods, Foundational Skills for Data Science

Experience

Data Analyst Intern

Seattle University Food Bank

Jan. 2026 - Present

Seattle, WA

- Cut stockouts 18% and overstock waste 12% in one quarter through data analytics on 340+ weekly orders in PostgreSQL to surface demand patterns by item category
- Automated restocking forecasts for 200+ households per week by building a logistic regression model in Python and deploying it as a REST API
- Supported 340 weekly orders averaging 10 items each by building an ordering system that serves roughly 500 real-time inventory lookups per day

Founder and Instructor

Bellevue Coding

Jan. 2025 - June 2025

Bellevue, WA

- Grew weekly enrollment from 4 to 12 students by founding and teaching a free Python program for ages 8 to 14 at the Bellevue Library
- Extended the program to a second age group, ages 13 to 17, by building a follow-on curriculum covering machine learning and analytics pipelines

Projects

Autonomous Ad-Spend Agent | Python, SQL, PostgreSQL (Neon), Meta Marketing API, GitHub Actions

2026

- Built an autonomous budget-allocation agent executing live ad spend without per-decision human approval, bounded by three independent enforcement layers (platform cap, campaign budget, agent-side weekly ceiling) so no single component failure can breach the spend limit
- Isolated all spend-affecting logic into a pure decision engine with no I/O or clock dependencies, making every allocation decision deterministic and reproducible from persisted inputs; validated with 169 tests including live-API and live-database coverage
- Ran automated A/B tests across creative variants with allocation gated on minimum sample thresholds, and hardened the measurement pipeline against null-vs-zero conflation so reporting outages could not be read as zero conversions

Dubly | Python, FastAPI, SQLite, Next.js, Claude API, Whisper

2026

- Earned selection for the UW-IT Student Innovation Lab Spring 2026 Community Showcase by building a study assistant that generates quizzes, flashcards, and study plans from Canvas course material
- Cut error rate under load from 35% to 0% by fixing a SQLite concurrency bug across 10 data stores using per-thread connections and WAL mode
- Reduced cost per conversation turn 74%, from \$0.0475 to \$0.0123, by profiling token-level accounting and introducing prompt caching

YutaChess | Node.js, WebSockets, Socket.IO, chess.js

2025

- Sustained 3,000 concurrent games at 1.89 ms median latency with zero state desynchronization by building a server-authoritative backend that validates moves and syncs state over WebSockets, verified across 374,000+ simulated moves

Leadership and Activities

Project Officer

UW Data Science Club

Sept. 2025 - Present

Seattle, WA

- Measured an R-squared of 0.72 between income and homelessness across greater Seattle by leading a 5-person team through a linear regression pipeline on 2,000+ cleaned HUD and Census records, with results delivered as a Tableau data visualization dashboard

Member

Machine Learning @ UW

Mar. 2025 - Present

Seattle, WA

- Classified Reddit comment streams in real time by fine-tuning DistilBERT and deploying with FastAPI on AWS EC2 behind a Streamlit dashboard

Technical Skills and Certifications

Languages: Python, SQL, JavaScript (ES6+), R

Data and Analytics: data analytics, data modeling, data visualization, pandas, NumPy, Power BI, Tableau, DAX, Excel, A/B testing, linear and logistic regression

Databases: PostgreSQL, MySQL, SQLite

Frameworks and Tools: FastAPI, Node.js, Next.js, React, Git, GitHub, GitHub Actions, AWS, Docker, Claude API, REST APIs

Certifications: AWS Certified AI Practitioner (2026); Microsoft Power BI Data Analyst Professional Certificate (2026); Anthropic AI Fluency (2026)

Awards: UW-IT Student Innovation Lab Community Showcase (2026)
